

Student Research Talks (StReeTs)

Mason Experimental Geometry Lab (MEGL)

Increasing outreach activities in the Illinois Geometry Lab

Claire Merriman

Department of Mathematics Sciences
University of Illinois at Urbana-Champaign

Abstract

The Illinois Geometry Lab is an undergraduate research lab at the University of Illinois at Urbana-Champaign which also runs outreach activities in the local community. I will talk about some of the existing outreach activities run by the IGL, as well as efforts to increase the number and variety of activities. The largest of these outreach projects is the Summer Illinois Math Camp for local middle and high school students, which I cofounded in 2015. We are also increasing the number of activities through the Exciting Outreach Activities IGL project this semester and starting an undergraduate mathematics outreach club.

Date: Friday, September 21, 2018

Time: 2:30pm – 3:20pm

Place: Exploratory Hall 4106

Pizza and soda will be served at the presentation.

For further information or for special accommodations, please contact Sean Lawton via email at slawton3@gmu.edu or drop by the MEGL.
