

STudent REsearch TalkS (StReaTs)

Mason Experimental Geometry Lab (MEGL)

Probability Theory: A Crash Course

Diego Torrejon

Department of Mathematics Sciences
George Mason University

Abstract

In this talk, we will develop the theory needed to prove the central limit theorem. We also discuss concepts only pertaining to probability theory such as distribution functions, random variables, independence, and expectation. Finally, we will work with measures different to the Lebesgue measure.

Date: Friday, May 1, 2015

Time: 2:30pm–3:30pm

Place: Exploratory Hall 4106

Pizza and soda will be served at the presentation.

For further information or for special accommodations, please contact Sean Lawton via email at seanlawton@gmail.com or drop by the MEGL.
