

Undergraduate Mathematics Research

Poster Session

by  and **EXTREEMS** students:

- Visualizing Continued Fractions
- Exploring Geometric Flows
- Arithmetic Dynamics
- Equivariant Cohomology of Flag Manifolds
- Dynamics of Red Coral Populations
- Mathematics Outreach
- Understanding the Behavior of Quasiperiodic Orbits
- Variational Data Assimilation for Neuronal Network Models
- A Machine Learning Approach to Housing Value Estimation

Vote for the Best Poster Award and see the MEGL Fall 2018 Student Research Opportunities!

Monday, May 7

3-6pm

Exploratory Hall Atrium
